EDUCATION

University of Central Florida | GPA: 3.87

Orlando, FL

B.S. in Computer Science, Minor in Digital Media

June 2024 – May 2028

- **Clubs:** EXCEL, Esports at UCF (Team Manager), Graphics Programming Knights (Outreach Lead)

EXPERIENCE

NASA

Kennedy Space Center, FL

Software Engineer Intern

August 2026 – Present

- Supporting Artemis mission launch imaging operations within the Advanced Imaging and Analysis Laboratory.
- Executed 4 successful field deployments of the **System for Photogrammetric Imaging, Detection, and Ranging (SPIDR)** project, managing hardware setup and calibration to capture launch imagery.
- Developing and improving custom controllers and a graphical user interface (**GUI**) for camera settings using **ROS** and **Python**.

Limbitless Solutions

Orlando, FL

Lead Game Programmer

May 2025 – August 2026

- Led technical development of an interactive **Unreal Engine** training game, architecting scalable, object-oriented core systems in **C++**.
- Engineered the integration of electromyography bionic hardware directly into the engine, mapping raw physical sensor inputs to responsive, zero-latency software actions with **95%** accuracy.
- Partnered across interdisciplinary teams to coordinate feature development, translating complex mechanics into functional **C++** logic and optimizing real-time execution.

The DRACO Lab

Orlando, FL

Machine Learning Researcher

January 2026 – May 2026

- Conducted research on resilient algorithms for decentralized autonomous drone swarms as part of the **SHARKS project (Secure, Heterogeneous, Autonomous, Rotational Knowledge for Swarms)**.
- Designed multi-agent coordination systems relying on local sensing and agent-to-agent communication, eliminating the need for a central controller.
- Programmed a reinforcement learning simulation in **Python** (Gymnasium), implementing tabular Q-learning with epsilon-greedy exploration to train autonomous agents in optimal pathfinding.

PROJECTS

V-RADS | Unity, C#, VR, Github

- Built V-RADS (Virtual Radiation Awareness & Detection System) for METIL, in partnership with the **Department of Energy (DOE) and Y-12 National Security Complex**.
- Developed a modular radiation detection system in **Unity**, utilizing the Inverse Square Law to simulate realistic radiation spread and dosage.
- Built custom **XR** mechanics and interactive Graphical User Interfaces, translating real-world physics into readable, real-time feedback systems for operators.

ShotLogic | React, Javascript, CSS, Python, Vercel, Render, Github

- Integrated the Google Gemini AI API into a **Python** routing system to parse video data, evaluate biomechanics, and generate real-time spatial analytics.
- Built a responsive frontend interface using React and custom **CSS** to cleanly visualize complex AI feedback and interactive coordinate maps.

SKILLS

Programming Languages: Python, C, C++, C#, Java, SQL, JavaScript, HTML, CSS, Verse

Tools & Frameworks: Unity, Unreal Engine, UEFN, Linux, Next.js, React, ROS, Git, Windows, Tailwind CSS, Blueprints, Vercel, Render, XR, Github, Photoshop, Figma

AWARDS & CERTIFICATIONS

Certifications: Adobe Photoshop, Unity Essentials Pathway, Unity Junior Programmer, Akamai Network Engineering, Akamai Customer Consulting and Support, Unreal Editor for Fortnite (UEFN) Bootcamp Participant

Awards: 3rd/15 – Knight Hacks Project Launch 2025, 1st/11 – GameDevKnights Summer 2025 Game Jam, UCF President's Honor Roll Recipient
